PROJECTS

---

1. <u>Dashboard Website</u> [*React.js*]   *Live* **|** *Source Code*

Description: Built React-based dashboard with reusable components, diverse charts, and tables utilizing React libraries. Employed React Router for navigation, fetched API data for dynamic table content with search capability. Implemented form validation for data integrity and user input accuracy.

Technology Used: Html, CSS, JavaScript , Bootstrap , React.js.

2. <u>Food Website</u> [*Bootstrap*]   *Live* **|** *Source Code*

Description : Created a visually appealing food website highlighting diverse culinary offerings and services of a renowned restaurant. Used Bootstrap for efficient development, ensuring consistent styling and responsiveness across devices.

Technology Used: Html, CSS, JavaScript, Bootstrap.

3. <u>Bug Tracking System</u> [*Final year Project*]

Description : Built a Java-based Bug Tracking System to monitor and manage project defects efficiently, enhancing software reliability and user experience by ensuring timely bug resolution. Features distinct roles (Employee, Manager and Administrator) with tailored responsibilities and functionalities.

Technology Used: Html, CSS, JavaScript, Java, JSP, Mysql, Apache.

4. *<u>Academic Management System</u> [During BCA*]   *Source Code*

Description : Created an Academic Management System with JSP to streamline administrative tasks, foster teacher-student interactions, and empower students in managing academic profiles efficiently. Features distinct roles (Admin, Teacher, Student) with tailored responsibilities and functionalities.

Technology Used: Html, CSS, JavaScript, Java, JSP, Mysql, Apache.

5. <u>News Website</u> [*React.js*]   *Source Code (ClassBased)* **|***Source Code(FunctionBased)*

Description : Designed and developed a dynamic, responsive news website using React.js and Bootstrap, integrating modern front-end technologies for an engaging user experience. Initially implemented with class-based components, later transitioned to function-based components. Managed web development, testing, and maintenance roles.

Technology Used: Html, CSS, JavaScript, Bootstrap, React.js.

SKILLS

Web Technology : HTML | CSS | Bootstrap | JavaScript | React.js
Programming : Java
Database : MySql
Open Source : WordPress
Tools : Notepad++ | VS Code | Eclipse
Version control : Git | GitHub

Experience Summary

- ➢ **Afame Technologies**

  Web Developer , Intern
    - o Proficient in front-end technologies (HTML, CSS, JavaScript) and frameworks like React.js, ensuring interactive user   interfaces.
    - o Experienced in version control with Git, integrating APIs for enhanced website functionality, and implementing responsive web design for optimal user experience.
- ➢ **Proficient** understanding of HTML, CSS, JavaScript, Bootstrap, React.js **.**
